"These clients longed for a Zen beach house getaway that would allow them to escape from the hustle and bustle of their everyday lives."

- Allen Construction

Project Highlights

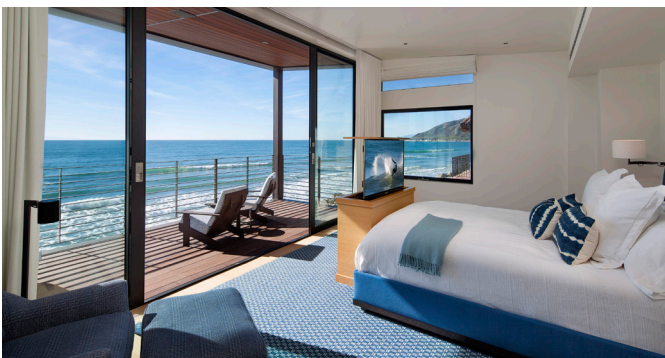

3,703 SF BEACH HOUSE
WALL-TO-WALL FLEETWOOD WINDOWS

This home is beautifully appointed with custom white oak cabinets, a beautiful blend of soapstone and carrera marble counter-tops in the kitchen, exposed concrete floors downstairs, and French white oak floors.

Fleetwood multi-slide doors and sliders give this home an unbeatable indoor-outdoor feel. Low maintenance Rysista decking and siding were used on the decks and balconies. Copper gutters and downspouts accent the exteriors. As with every beach front house we build, we also provided the owners with a suggested maintenance schedule to help ensure that they keep the unforgiving sun and salt air found by the beach at bay.
