*"We really enjoyed the building process and we were a great team."*

- Peter H., Client

## *Project Highlights*

### 4,700 SF MEDITERRANEAN STYLE HOME

---

Timeless elegance was the focus for this stately renovation.

The kitchen was gutted and updated with new hand-hewn, solid wood ceiling beams to match existing beams in the living room. The original master suite and two adjacent bedrooms were converted into a larger, more sophisticated master suite complete with "his" and "her" bathrooms, both of which boast barrel and groin vaulted ceilings. One of the original bedrooms has been transformed into a new, formal study accented by genuine leather flooring.

Because the owners love to entertain, a new, curved stairway leads visitors from the main house down to the expansive pool area. A spacious cabana, complete with bar and fireplace, is tucked into the hillside below the existing house. A greenhouse, raised beds for vegetables and a new chicken coop with a French provincial design are delightful finds elsewhere on the grounds.
