Project Highlights

14,000 SF FRENCH TUDOR ESTATE
GRAND LOGGIA WITH ALFRESCO DINING

This extensive whole house remodel included modern upgrades adding upscale elegance to this 14,000 sq. ft. French Tudor, originally built in 1977. New features include an expansive kitchen and family room; a grand loggia with alfresco dining, BBQ, and seating areas; and a four-car garage with a movie theater on the floor above.

Additional luxury amenities include an infinity pool and spa, wine cellar, exercise room, and new landscape. Coffered ceilings accented by walnut beams in the living room, office and grand room echo the exterior's Tudor decorative timbering aesthetic. New flooring throughout, including dark French oak and two types of limestone imported from France, add the opulence the owner desired.

Elaborate stone masonry work adorns the exterior and the steeply pitched roof, made of 5/8" American slate, is punctuated by dormer windows and copper gutters.
